

Functional Optometry

A GREAT
BEHAVIORAL/
FUNCTIONAL
OPTOMETRIST IS
LIKE POETRY
WITH A
REMAINING
IMPRESSION
AND A MIRROR
OF HIS TIME

Tutorial Support

We offer each BOAF-EASO member freely selectable tutorials via webinar. In these tutorials the member has a fellow to advise and to answer technical questions.

So that the Office or the dean of the BOAF can select the optimal tutor and he can prepare comprehensively for answering the question, the member submits his question together with the desired date for the tutorial in advance in writing in the office.

Member - Intercontinental Coalition of Behavioral Optometry Partner Programm (ICBO)

A modern approach

"BOAF-EASO" offers a modern and high-quality professional education for master opticians in the form of seminars, meetings, workshops, articles, webinars and much more, to make this wonderful work better known. Training in Behavioral Optometry / Functional Optometry is enormously important for a daily professional work. Our vision is to engage in clinical competence and research in behavioral optometry.

Most people do not realize that 17 visual skills are necessary to succeed in reading, learning, doing sports and in life. 100% vision is just one of those abilities.

The BOAF-EASO conveys the knowledge of how you, as a Behavioral/Functional Optometrist, can provide your clients with balance and harmony.

Basic Educations

The BOAF-EASO offers 3 different basic educations courses in Behavioral Optometry.

Behavioral Optometry is probably the most exciting field of ophthalmic optics. It works with people of all ages and intellect. The basic assumption of this activity is that seeing is a subset of perception and good vision requires many acquired abilities. Each and every one of these skills must be developed by each person as part of their overall development.

High quality education is needed to assess which skills are well-developed and how they can be improved in the event of deficits.

The BOAF-EASO basic educations covers these 3 different areas:

- FO - Behavioral/Functional Optometrie and VT
- SO - Syntonic Optometrie
- VT - Vision Trainer

Certification

Our 3 different basic educations can be completed with an examination. And lead to the following titles:

- FO - "Functional Optometrist from the Behavioral Optometry Academy Foundation".
- SO - "Syntonic Optometrist from the European Academy of Syntonic Optometry".
- VT - "Vision Trainer from the Behavioral Optometry Academy Foundation".

BOAF-EASO also offers its members the BOAF-EASO Fellowship Program. This leads to the following titles:

- FBOAF - "Fellow - Behavioral Optometry Academy Foundation".
- FEASO - "Fellow - European Academy of Syntonic Optometry".
- IFBOAF - "Interdisciplinary Fellow - Behavioral Optometry Academy Foundation".

Become a

- Functional Optometrist
- Syntonic Optometrist
- Vision trainer

- from BOAF-EASO

and you will change your career and the lives of your customers!

- Further information about our basic training and examinations can be found in the brochure: "youreducation".

- Event dates can be found on the BOAF homepage.
